Date	19-november-2022
Team id	PNT2022TMID40987
Project Name	Project – Crude Oil Price Prediction
Maximum Marks	

Project Flow

Data collection

Collection of data or Create Dataset

Data Pre Processing

Import the libraries					
Importing the dataset					
Analyze the data					
Taking Care of Missing Data					
Feature Scaling					
Data Visualization					
Splitting Train and Test Data					
Creating Dataset with Sliding Window					

Import the Model Building Libraries	
Initializing the Model	
Adding LSTM Layer	
Adding Output Layer	
Configure the Learning Process	
Training the Model	
Model Evaluation	
Save the Model	
Test the Model	

Application Building

Create HTML file
Build Python Code
